Municipal Water use restriction update August 4th 2010

Please be advised that we are required to implement further water restrictions based on the water levels in the Hopkinton Reservoir. Due to the continued decline in reservoir levels, all outdoor use other than hand watering of flowers and vegetable gardens outside of the hours of 9 AM to 5:00 PM, is now restricted. These restrictions apply only to users of the municipal water system.

Thank for your cooperation in this extremely important matter to help maintain an adequate water supply for daily essential needs and fire protection.
